

Get ready for your new website!

This checklist will help you stay one step ahead and make the most of our time together. Here's how you can prepare:

Gather inspiration

Start collecting ideas for your dream website! Look at 2-4 example websites (or more), focusing on layouts, colors, or sections you love. Don't limit yourself —magazines, social media, and other graphics are great sources of inspiration too!

Organize your images

Put together all the images you'd like to use on your site and save them in a Google Drive folder. From product photos to team shots, having them ready will save you time later.

Plan your pages

Think about the pages your website needs (e.g., Home, About, Shop, Contact). Will you be selling products or offering bookings? Don't worry—I'll guide you through this, but having a general idea is a great start.

Get your logins ready

If you already have a domain or website, make sure you have the login details handy for the platform they're built on (like Squarespace, Wix, or Shopify).

Access a computer

While we'll ensure your site looks great on mobile, it's helpful to also have access to a computer for reviewing it across devices.

Be ready to collaborate

This process works best when we're a team! Be prepared to share timely feedback and make decisions so we can keep the momentum going.

Bonus tip

Think about your brand voice and message. Are there words, taglines, or themes you want to shine through? Having clarity on this will help us create something truly exceptional.
